

# Sarasota/Manatee Draft Tentative Work Program: July 1, 2017<sup>?</sup> June 30, 2022

Highlights identified as of November 18, 2016

## FDOT Draft Tentative Work Program

The work program is a five-year plan developed and maintained to maximize the Florida Department of Transportation's production and service capabilities through innovative use of resources, increased productivity, reduced cost, and strengthened organizational effectiveness and efficiency. The MPO's project priorities from the previous year (2016 adopted project priorities, in this case) are considered during the development of the tentative work program.

According to MPO policy, projects with at least one phase funded in this work program should receive funding for the next project phase before 2016 Project Priorities receive funding.

Prior to the legislative session, the tentative work program is submitted to the Florida Legislature, the Executive Office of the Governor, the Florida Transportation Commission (FTC) and the Department of Economic Opportunity (DEO) for review. The tentative work program eventually becomes the adopted work program and informs the MPO's Transportation Improvement Program (TIP). The first year of this adopted work program will then become the current work program year. The new tentative work program is representative of the last four years of the current adopted work program plus any new formal project programming in the new fifth year.

The purpose of this document is to help members of our Board, committees, and the public quickly identify new projects, cost increases to existing projects, and other changes to existing projects in the Sarasota/Manatee Draft Tentative Work Program.

**Projects in gray are located in Manatee County.**

**Projects in tan/orange are in Sarasota County.**

**Projects in blue are located in both counties.**

**Project with a 2016 Project Priority Rank of <sup>?</sup>P<sup>?</sup> were previously programmed in a past work program.**
