

SARASOTA/MANATEE MPO 2020 PROJECT PRIORITIES

Funded	These projects are funded in the current work program with at least one phase funded. Continuing and completing existing projects is the first priority of the MPO and supports the national goal of accelerating project delivery. These projects include Major Improvements.
L RTP Cost Feasible Priorities	The MPO must develop a Long Range Transportation Plan (LRTP) that addresses no less than a 20-year planning horizon. The intent and purpose of the LRTP is to encourage and promote the safe and efficient management, operation, and development of a cost-feasible intermodal transportation system that will serve the mobility needs of people and freight; and foster economic growth. The LRTP must include long and short-range strategies consistent with Federal, State, and local goals and objectives.
Central Manatee Network Alternatives Analysis (CMNAA)	The CMNAA study identified projects with the goal to improve mobility, safety, and accessibility on both sides of the Manatee River in the study area. The study developed viable project alternatives that could be implemented immediately or could be advanced to future phases.
Barrier Island Traffic Study (BITS)	FDOT is conducting a study to examine the feasibility of improving the overall traffic operations and circulation of motorized and non-motorized traffic on the Sarasota/Manatee Barrier Islands. This study is evaluating a variety of elements including travel patterns of users on the islands, trips on and off the islands, destination points, existing transit service, existing parking facilities, bicycle/pedestrian facilities and needs, and land development as they are related to parking.
Safety Priorities	MAP-21 and the FAST Act legislation require MPOs to implement outcome-based planning beginning with five safety measures for a 5-year rolling average. States and MPOs are to: “Invest resources in projects to achieve individual targets that collectively will make progress toward national goals.” The MPO in collaboration with FDOT, CTST, and the jurisdictions, selected and conducted four safety assessments at six high crash locations on state roads.
Strategic Intermodal System	Florida’s Strategic Intermodal System is a high priority network of transportation facilities important to the state’s economic competitiveness. The SIS Policy Plan is a primary emphasis of FTP implementation and aligns with the current FTP Policy Element.
TRIP	The purpose of this program is to provide funds to regionally significant projects throughout the planning area pursuant to s.339.155.
Jurisdiction Needs	The MPO accepted applications for each jurisdiction’s priorities throughout the region. These represent all types of projects and were ranked using the MPO adopted scoring criteria. Funding consideration will be determined by resource availability and project type. These projects are listed for illustrative purposes and may be considered for funding in the 2045 LRTP.

SARASOTA/MANATEE MPO 2020 PROJECT PRIORITIES

2020 RANK	2019 RANK	Facility (Project)	Limits	Description of improvement	Next Phase	Jurisdiction	TOTAL SCORE	Status
